DATA SHEET

Stellar Cyber Open XDR for MSSPs – The All-in-One Multi-Tenant SecOps Platform

Unified, Simplified, Automated, Under a Single License

With more organizations looking at outsourcing security and the number of MSSPs increasing, you are under intense pressure to offer differentiated, affordable security services while growing your revenue and improving your margins. You need to do more with your current staff to meet your objective. **Stellar Cyber Open XDR for MSSPs** helps you bring services to market faster while enabling your security staff, regardless of expertise, to deliver services efficiently to a larger group of customers, boosting your bottom line.

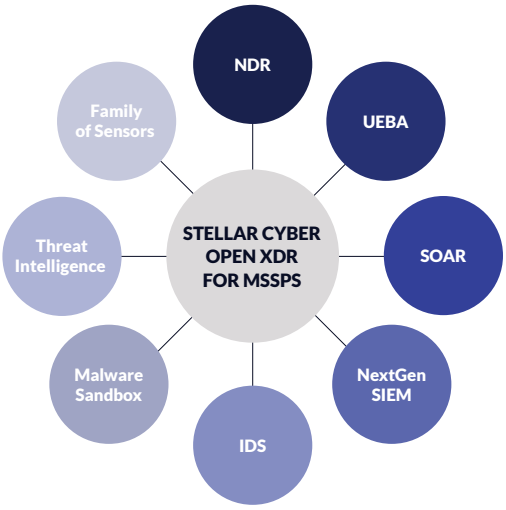
Stellar Cyber Open XDR for MSSPs:

- Ingests, normalizes, enriches, and stores all your customer's security data, including endpoints, network, cloud, and logs into a single repository
- Automatically detects and correlates alerts using a proprietary multi-modal threat detection engine driven by machine learning
- Accelerates threat investigations and threat hunting with contextual data and correlated incidents
- Provides automated and manual response actions in real-time

Stellar Cyber Open XDR for MSSPs Benefits:

- Deliver the security services your customers need affordably and efficiently
- Increase your addressable market by eliminating barriers to customer adoption
- Drive increased efficiency across your security operations team, enabling customer growth with existing staff

Stellar Cyber Open XDR for MSSPs includes NexGen-SIEM, TIP, UEBA, NDR, SOAR, and more under a single license, providing the capabilities an MSSP needs to deliver comprehensive security services.



Stellar Cyber works with your customers' existing security stack. Simply select your customer's current security products from the list of hundreds of pre-built integrations through the collectors and/or deploy proper sensors across their on-prem and cloud environments.

In minutes Stellar Cyber Open XDR automatically ingests, normalizes, enriches, and analyzes the data collected to identify active threats in their environment and store them for threat hunting or forensics. Simple as that.

From Detection Through Response

Finding hidden threats is valuable, but that is only the beginning. Stellar Cyber Open XDR for MSSPs delivers comprehensive threat lifecycle management, from initial detection through threat correlation and response. With Stellar Cyber Open XDR for MSSPs, your team can complete all their investigations and responses in one solution, boosting productivity and efficiency.

STELLAR CYBER®

STELLAR CYBER OPEN XDR FOR MSSPS CORE CAPABILITIES:

Intelligent Multi-Tenancy

Ensure no commingling of customer data while enabling security analysts to service multiple customers easily with the Stellar Cyber approach to smart multi-tenancy enabling new customers onboarding in seconds with a few clicks and customers' management easy

Sensor-Driven Data Collection

Use the proprietary Stellar Cyber sensors to collect raw network and log data from customers to identify additional threats not seen by their existing security stack

Automated Threat Hunting

Using easy-to-understand querying formats, security analysts can create customized threat hunts that can be run ad-hoc or on a set schedule

Machine Learning Correlation

Using graph machine learning techniques, seemingly disparate alerts are combined into incidents providing security analysts with contextualized and prioritized threats to investigate

Deterministic Incident Response

Using predefined response actions, or customizable response playbooks security analyst can take decisive response actions manually or enable Stellar Cyber to fully automate response

Ultra-Flexible Data Sourcing

Incorporate data from any existing security control, IT, and productivity tool into the Stellar Cyber using pre-built integrations; no human intervention is required

Purpose-Built Data Normalization and Enrichment

Data from any source is automatically normalized and enriched with context such as TI by Stellar Cyber to enable comprehensive, scalable data analysis

Multi-Modal Threat Detection Engine

Complex threats are identified using a combination of static rules, supervised and unsupervised machine learning, and automated threat hunting to deliver the most comprehensive view of threats possible

Guided Investigations

Correlated incidents include the underlying data and context a security analyst needs to complete investigations fast, increasing efficiency and effectiveness

Easy Customization

MSSPs can create dashboard, reports, automatic threat hunting rules, etc. to provide differentiated services to their customers

TAKE THE FIRST STEP TODAY

Every security team should be able to deliver continuous, consistent security regardless of their skills or experience. With Stellar Cyber Open XDR for MSSPs, you get the capabilities you need to keep your customers' business secure. **Visit www.stellarcyber.ai today to start your journey.**
